

Opera Smartphone apps

The Softphone App is the extension of your company PBX to your smartphone giving you Fixed Mobile Convergence with Hold and Transfer of calls and presence information for colleagues. Enjoy all the benefits of your secure company PBX from your smartphone.

Apple iPad tablet

Features:

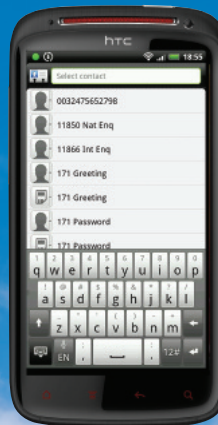

- Single number for both your desk-top phone and mobile devices.
- Incoming calls to your fixed desk phone are automatically routed to your smartphone.
- The calling number identity is displayed for incoming calls (and not your PBX number).
- All outgoing calls from your smartphone use your fixed Calling Line Identity number on the Company PBX.
- Make calls on the app from the smartphone contact list or from the centralized company phone directories. In either case, you present the CLI number of the Company PBX.
- See the status of colleagues in real time.
- Busy on mobile device status is indicated to other users.
- Call history - missed calls, received calls, dialled calls.
- Listen to and manage your company voicemails.
- The PBX may be programmed to send all your app calls over IP, or over the GSM network, or to the GSM network when you're off site and WiFi on your LAN.
- Flip during a call from VoIP to GSM service or the other way, depending on signal quality.

Softphone for Android

Softphone for iPhone

Typical applications

► **Medical:**
Doctor ringing patients from the mobile app presents the telephone number of the surgery.

► **Media:**
All incoming calls to the office are presented on the app, with the actual number of the caller. You can identify the caller before answering.

► **Legal:**
Use the app to dial from the Android phone book or from the PBX phone books.

► **Designers:**
See the telephone availability status of colleagues.

Free on-line download:

Search for "Opera Softphone" to download from the iStore or from the PlayStore. The app runs on Android smartphones and tablets and on Apple iOS iPhone and iPad. A registration licence must be applied to your system to activate the app.
